NEWS RELEASE **KEX2007-16**

Rosebud AZ, Diamond Drill Contract Awarded

Kent Exploration Inc ("the Company") reports that it has entered into a contract with Global Energy Services to conduct a diamond drilling program on the company's 100% optioned Rosebud property. The drill program, consisting of up to 1,500 meters of HQ diamond drilling, is to test the eight known veins on the property to depth.

In 1996, Reliance Geological Services conducted surface sampling on the veins, which include the Southwick veins, two veins approximately 15 meters apart that run parallel for a known strike of approximately 1.6 kilometers, and concluded they were highly prospective for gold and silver mineralization. A number of samples were taken from the east end of the 100 level of the Southwick north vein during a limited sampling program in late 2005 and reported in the Company's news release KEX2005-5, which can be viewed at http://www.kent-exploration.com/news/2005/Kent2005-5.pdf

****

Kent Exploration Inc is a junior exploration company that is earning a 100% interest in the Rosebud property, a gold/silver prospect in northern Arizona, has a 100% interest in a mining lease option on a gold/silver/barite prospect in eastern Washington state, and has earned a 50% interest in the Ivanhoe Creek property, a Midas-style target in Nevada's Carlin Trend.

This News Release has been prepared on behalf of the Kent Exploration Inc Board of Directors, which accepts full responsibility for its contents.

ON BEHALF OF THE BOARD

"Graeme O'Neill"
